ABSTRACT

The data in this report on associate degrees and completions of occupational curricula and other programs below the baccalaureate level were collected from 1,404 two- and four-year institutions (100 percent response) through part C of the annual Higher Education General Information Survey, Degrees and Other Formal Awards Conferred Between July 1, 1971, and June 30, 1972. Included in this publication are summary data, as well as data for individual institutions on associate degrees and other awards in the following areas: (1) arts and science or general programs not organized as occupational curricula; (2) science-related or engineering-related organized occupational curricula at the technical or semiprofessional level, divided by subject field designation; (3) nonscience-related and nonengineering-related organized occupational curricula at the technical or semiprofessional level, divided by subject field designation; (4) organized occupational curricula below the technical or semiprofessional level. Data are variously organized into voluminous tables by control and level of institution, type and length of curriculum, type of credit and award, sex of student, and state. (Author/NHM)

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

HIGHLIGHTS

1. A total of 357,316 completions of sub-baccalaureate curriculums, for which associate degrees or other formal recognition was given, were reported in 1971-72 (a 16.1 percent increase over 1970-71).

2. An increase in associate degrees over the 1970-71 total was awarded:

   294,110 -- total associate degrees (15.8-percent increase);

   227,459 -- for work wholly or chiefly creditable toward a bachelor's degree (20.5-percent increase);

   66,651 -- for work not wholly or chiefly creditable toward a bachelor's degree (2.3-percent increase).

3. In addition to the associate degrees, 63,206 other awards (an increase of 17.2 percent over 1970-71) were made:

   21,962 -- in curriculums having a duration of 2 or more but less than 4 years (an increase of 7.7 percent);

   41,244 -- in curriculums of at least 1 year but less than 2 years (an increase of 22.9 percent).

4. In the organized occupational curriculums, a total of 195,492 associate degrees and other formal awards were conferred--190,039 at the technical or semiprofessional level and 5,453 below that level.

5. Of the 190,039 degrees and awards in occupational curriculums at the technical or semiprofessional level, business and commerce technologies accounted for 61,077 (32.1 percent); mechanical and engineering technologies, for 44,145 (23.2 percent); and health services and paramedical technologies, for 45,412 (23.9 percent).

6. In the arts and science or general programs, not organized as occupational curriculums, 161,824 associate degrees and other formal awards were conferred in 1971-72.

7. By control of institution and by sex of student, proportions of the total sub-baccalaureate completions were as follows:

   by control--public, 86.4 percent; private, 13.6 percent;

   by sex--men, 55.2 percent; women, 44.8 percent.

8. Women received:

   43.3 percent of all associate degrees;

   46.6 percent of all associate degrees and other awards based on organized occupational curriculums at the technical or semiprofessional level;

   30.8 percent of all associate degrees and other awards based on organized occupational curriculums below the technical or semiprofessional level.

FOREWORD

This report presents data from the annual survey by the National Center for Education Statistics on associate degrees and other formal awards based on less than 4 years of work beyond high school in U.S. institutions of higher education.

Data for this report were obtained from the survey instrument "Degrees and Other Formal Awards Conferred Between July 1, 1971, and June 30, 1972," which is part of the seventh annual Higher Education General Information Survey (HEGIS). Detailed information on baccalaureate and higher degrees is presented in a separate report entitled Earned Degrees Conferred, 1971-72.

Mrs. Mary Evans Hooper was the survey director responsible for the conduct of the survey and the analysis of the data, with the technical assistance of Mrs. Agnes Q. Wells. After the retirement of Mrs. Hooper, the present report was prepared by Curtis O. Baker, newly appointed survey director, and Agnes Q. Wells, associate survey director.

For the fourth consecutive year, this survey attained a response rate of 100 percent. The National Center for Education Statistics is most appreciative of the efforts of registrars and other college and university officials who supplied the data promptly and efficiently.

Theodore H. Drews, Acting Director
Division of Survey Planning and Analysis

Edith M. Huddleston, Acting Chief
Higher Education Surveys Branch

ACKNOWLEDGMENTS

The preparation of a publication by the National Center for Education Statistics is the result of the work of many individuals. Without the efforts of these loyal employees this report would not be published. Some of these individuals are identified by name elsewhere in this publication. Here we acknowledge the contribution of those who receive no other recognition.

INTRODUCTION

The data in this report on associate degrees and completions of occupational curriculums and other programs below the baccalaureate level were collected from 1,404 institutions through part C of the questionnaire "Degrees and Other Formal Awards Conferred Between July 1, 1971, and June 30, 1972." (See appendix for a copy of this form. The totals in the data cells are for the aggregate United States.) This survey was part of the seventh annual Higher Education General Information Survey (HEGIS). Beginning with the survey of sub-baccalaureate degrees and awards conferred in 1965-1966 (part of the first HEGIS), data have been obtained and reports have been issued annually except for two survey years, 1965-66 and 1966-67, when one combined report was published.[1]

Included in the present publication are summary data as well as data for individual institutions on associate degrees and other awards in the following:

1. Arts and science or general programs, not organized as occupational curriculums.

2. Science-related or engineering-related organized occupational curriculums at the technical or semiprofessional level, divided by subject field designation.

3. Nonscience-related and nonengineering-related organized occupational curriculums at the technical or semiprofessional level, divided by subject field designation.

---

[1] Between 1956 and 1962, prior to the HEGIS series, six surveys of organized occupational curriculums were conducted. The report of the sixth survey in that group, published in 1965, was titled Guide to Organized Occupational Curriculums in Higher Education--Graduates: July 1, 1961, Through June 30, 1962, and Enrollments: October 1, 1962 (OE 54012-62, Circular No. 771).

4. Organized occupational curriculums below the technical or semiprofessional level.

The HEGIS which obtained these data for 1971-72 was the second to utilize the new classification of fields of study published in A Taxonomy of Instructional Programs in Higher Education (OE-50064). The taxonomy extensively reorganized data categories in such a way as to reflect the most common current practices in institutions of higher education.

While the 1971-72 data are comparable with the 1970-71 data, the introduction of the new field classification system means that any comparisons with data prior to 1970-71 should be made with particular care. A degree of comparability is possible through use of a translation table included with the taxonomy. However, the additions of new fields, together with changed distributions and descriptions of fields formerly included, changed the classification base to such an extent that in many cases significant comparisons would be impossible.

Survey data for earlier years on associate degrees and completions of occupational curriculums below the baccalaureate level may be considered comparable for the following:

1. Associate degree programs (based on work wholly or chiefly creditable toward a bachelor's degree) for the survey years 1966-67 through 1969-70.

2. Programs at the technical or semiprofessional level for the survey years 1967-68 through 1968-70.

3. Programs below the technical or semiprofessional level for the survey years 1968-69 and 1969-70.

For comparisons of data for any years in the 1966-70 period, see Associate Degrees and Other Formal Awards Below the Baccalaureate, 1969-70 (DHEW publication No. (OE) 72-48), where data for these years are summarized in pages 3-8.

SURVEY COVERAGE AND METHODOLOGY

Institutions Included

The National Center for Education Statistics' (NCES) higher education survey universe for 1971-72 is based on the list of institutions included in the Education Directory, 1970-71, Higher Education (OE-50000-71), with such changes as were known in fall 1971. The questionnaire "Degrees and Other Formal Awards Conferred Between July 1, 1971, and June 30, 1972"--part of the seventh HEGIS--was sent to all institutions of higher education in this universe. Each institution was requested to supply data in all applicable parts of the survey--data on bachelor's and higher degrees as well as on awards below the bachelor's level. (The present report is confined to data below the bachelor's level.) NCES staff efforts elicited complete survey data from each of the 1,404 institutions in the survey universe, making it unnecessary to make any imputations or to provide any estimates for data categories in this report.

The 1,404 institutions of higher education in the United States and its outlying areas (aggregate United States) that furnished data for this survey represented, as far as could be determined, the total number of institutions (in the survey universe) that conferred associate degrees or other formal awards below the baccalaureate during the period July 1, 1971, through June 30, 1972.

The surveyed institutions broke down as follows:

Level of institution	Total	Control	
		Public	Private
All institutions	1,404	887	517
4-year institutions	486	202	284
Universities	95	65	30
Other 4-year	391	137	254
2-year institutions	918	685	233

There were 65 more institutions (43, publicly controlled; 22, privately controlled) reporting sub-baccalaureate data in 1971-72 than in 1970-71. Of the 43 public institutions, 39 were 2-year, 4 were "other 4-year." The number of public universities remained the same for both years. Of the 22 private institutions, 1 was a university, 18 were "other 4-year," and 3 were "2-year."

This survey does not include those technical schools or other institutions that were not eligible for directory listing. Many of these institutions, as well as organizations in business, industry, and labor, have technical education programs beyond the high school level to meet the needs of individuals and their employers.

Collection of Data

Included in this survey were associate degrees and other awards based on less than 4 years of work beyond high school. The associate degrees reported represented work taken in curriculums of 2 or more, but less than 4, years. These curriculums were either in arts and science or general programs or in organized occupational curriculums. There was the further differentiation between associate degrees with work wholly or chiefly creditable toward a bachelor's degree either at the reporting institution or by transfer to another institution, and those with work that was not. Also included were awards or other formal recognition (without associate degree) based on completion either of arts and science or general programs or of an organized occupational curriculum. It is important to note that, if a student received both an associate degree and other type of recognition for the same 2-year curriculum, the combination is counted just once. (See part C of the survey instrument in appendix for the survey instructions and the criteria for inclusion of data.)

Verification of Data

To obtain complete and accurate data, the completed questionnaires were examined, analyzed, and reviewed for compliance with instructions to respondents. The data were further compared with the data reported by the respondents in questionnaires for this survey in prior years. These comparisons took account of changes resulting from adoption of the taxonomy categories for instructional programs and use of the table in the taxonomy which translates the curriculums used in the earlier surveys into the new coding system. Reference was made, when necessary, to institutional catalogs and other sources for criteria and descriptions of associate degrees and organized occupational programs. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of reported data. In some instances, institutions provided information about significant program changes that would account for large increases or decreases in reported data.

ORGANIZATION OF THE TABLES

The tables are presented in the same order and format as in the previous report. This unchanged format will facilitate comparisons between survey years.

Tables 1-4, 7, and 9-19 present data both on associate degrees and on other awards based on less than 4 years of work beyond high school in institutions of higher education. Tables 5, 6, and 8 pertain only to associate degrees conferred in institutions of higher education.

Table 1 presents summary data by control and level of institution. Institutions are classified by level as "4-year" and "2-year." Within the "4-year" group, institutions are further classified as "universities" and "other 4-year." Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" group. The classification of "2-year institutions" includes junior colleges, technical institutes, and other schools offering at least a 2-year but less than a 4-year program of college-level studies.

Table 2 shows, by State, the data summarized in table 1. In both tables 1 and 2, the data are combined by level and type of curriculum. Data on curriculums at the technical and semiprofessional level are combined with data for curriculums below that level, and there is no distinction as to curriculum content.

Table 3 gives for each institution the numbers of associate degrees and other awards based on organized occupational curriculums. Awards in organized occupational curriculums are reported separately by curriculum category (science- or engineering-related or nonscience- and nonengineering-related). In this table no distinction is made for length of curriculum.

Table 4 has State data on associate degrees and other awards based on organized occupational curriculums, classified by control and level of institution and by length of program. Data are combined by level and type of curriculum.

Table 5 is a summary of associate degrees only, by type of credit (work wholly or chiefly creditable toward a bachelor's degree and that which is not) and by control and level of institution.

Table 6 presents data for the associate degrees in table 5 by State and institution.

Table 7 has a breakdown of associate degrees and other awards by control and level of institution and length and level of curriculum.

Table 8, limited to associate degrees only, is a State listing by type of credit.

Table 9 has data for all curriculums, by type of award and length of curriculum, in a detailed institutional listing by State.

Table 10 is a summary table of associate degrees and other awards by curriculum division.

Table 11 is another detailed institutional listing of associate degrees and other awards by curriculum division and specialty.

Tables 12 and 13 present summaries of the data in table 11 by control and level of institution in science- or engineering-related organized occupational curriculums and nonscience- or nonengineering-related organized occupational curriculums, respectively.

Table 14 shows a State listing of associate degrees and other awards separately by type of award and length and level of curriculum.

Table 15 summarizes these awards by curriculum division and specialty.

Table 16 shows these data by curriculum division and institution.

Tables 17 and 18 are concerned with arts and science or general programs and present these data by control and level of institution and State, respectively.

Table 19 provides data on these awards by individual institution and State.

WASHINGTON, D.C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY

DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1971 AND JUNE 30, 1972

PLEASE READ INSTRUCTIONS BEFORE COMPLETING THIS FORM

O.M.B. NO. 51–R0561
APPROVAL EXPIRES: 6/30/74

1. INSTITUTION CODE NUMBER

2. DUE DATE
Not later than August 15, 1972

Items 1, 3, 4, 5, and 6 MUST be completed by all institutions. If applicable, complete items 7 and 8. Submit a separate survey form for each of the campuses or branch campuses of the institution. If it is impossible to provide separate data for any branch campus, and the data for that branch must be included in the parent institution's report, indicate this in item 8 below.

3. NAME AND MAILING ADDRESS OF INSTITUTION OR CAMPUS COVERED BY THIS REPORT *(Include city, State, and ZIP code)*

4. NAME AND TITLE OF RESPONDENT

5. TELEPHONE NUMBER OF RESPONDENT *(Area code, local number and extension)*

6. THE INSTITUTION COVERED BY THIS REPORT IS (Check only one)

(a) ☐ A SINGLE-CAMPUS INSTITUTION

(b) ☐ A MAIN CAMPUS *("Parent" institution)* WITH ONE OR MORE BRANCH CAMPUSES AND/OR OTHER CAMPUSES *(Specify in item 8 below)*

(c) ☐ A BRANCH CAMPUS OF A PARENT INSTITUTION *(Specify the name of parent institution below)*

(d) ☐ ONE OF THE ADMINISTRATIVELY EQUAL CAMPUSES OF A MULTI-CAMPUS INSTITUTION

7. IF THE INSTITUTION COVERED BY THIS REPORT IS INCLUDED IN AN INSTITUTIONAL SYSTEM, WRITE THE NAME OF THE SYSTEM BELOW.

8. PARENT INSTITUTIONS *(As checked in item 6b)* SHOULD LIST THE NAMES OF BRANCH CAMPUSES BELOW. USE THE FIRST COLUMN TO SHOW WHETHER DATA FOR ANY OF THESE UNITS ARE INCLUDED WITH THE "PARENT" IN THIS REPORT.

ARE DATA FOR THIS UNIT INCLUDED IN THIS REPORT?	NAME OF BRANCH CAMPUS AND/OR OTHER CAMPUS	ADDRESS (City, State, and ZIP code)
☐ YES ☐ NO		
☐ YES ☐ NO		
☐ YES ☐ NO		

Data shown on the form are for the aggregate United States

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1971 AND JUNE 30, 1972

INSTRUCTIONS FOR PART C: DEGREES AND COMPLETIONS BASED ON LESS THAN 4 YEARS

Part C consists of 5 sections, as follows:

Section 1: Arts and science or general programs, NOT organized as occupational curriculums

Section 2: Science-related or engineering-related organized occupational curriculums at the technical or semiprofessional level, subdivided by subject field designation

Section 3: Nonscience-related and nonengineering-related organized occupational curriculums at the technical or semiprofessional level, subdivided by subject field designation

Section 4: Total of sections 1, 2, and 3

Section 5: Organized occupational curriculums BELOW the technical or semiprofessional level

Each student's curriculum is to be reported in the ONE section where it best fits. If a student has received both an associate degree and a certificate for the same 2-year curriculum, the completion is to be counted just once. A combination curriculum which includes both general courses and occupational courses at the technical or semiprofessional level should be reported in section 2 or 3 if it meets all the criteria of an organized occupational curriculum *(see below)*; otherwise it would be reported in section 1. Organized occupational curriculums BELOW the technical or semiprofessional level should be reported only in section 5. In all sections, report whole curriculums only—not individual courses.

For purposes of this survey, an organized occupational curriculum is one which meets all four of the following criteria:

A. High school graduation or equivalent, but no work beyond high school, is required for admission to the curriculum.

B. The curriculum is a series of required and elective courses constituting an integrated program designed to prepare students for IMMEDIATE employment in a SPECIFIC occupation or cluster of occupations. A group of courses, even when all of them are in a given subject area, do not necessarily constitute an organized curriculum.

C. Completion of the curriculum requires at least one but less than four years of full-time attendance, or the equivalent in part-time attendance over a longer period. A "year" means an academic year of approximately nine months.

D. The curriculum leads to ANY type of formal recognition *(certificate, associate degree, diploma, a transcript recognizing successful completion, a statement of completion from an administrator of the institution, or other FORMAL recognition)* signifying that the student has completed an organized curriculum; or the State grants a license or other formal recognition, upon examination, to all graduates of the curriculum.

Note that, for purposes of this survey, organized occupational programs are NOT designed as the equivalent of the first one, two, or three years of a baccalaureate degree program.

Example: Pre-engineering is NOT an organized occupational curriculum as defined in this survey, because it is designed to prepare students for CONTINUATION in the regular engineering program for the bachelor's degree. If an associate degree was awarded for this program, it should be reported in Section 1, columns 4-5. If no associate degree was awarded. it should be excluded from this survey altogether.

Engineering technology IS an organized occupational curriculum, as defined in this survey, because it is designed to prepare students for immediate employment upon completion. It should be reported in Section 2.

Work taken in an organized occupational curriculum may or may not be wholly or chiefly creditable toward a bachelor's degree in your institution or by transfer to another institution. The columns on the survey form provide for the following distinctions in reporting completed programs of 2 or more years but less than 4 years:

Work wholly or chiefly creditable toward a bachelor's degree:

Associate degree
Other formal recognition *(without associate degree)*

Work NOT wholly or chiefly creditable toward a bachelor's degree:

Associate degree
Other formal recognition *(without associate degree)*

Before submission of the survey form, please verify the accuracy of all column totals.

NAME OF INSTITUTION | 1. INSTITUTION CODE NUMBER

PART C. DEGREES AND AWARDS BASED ON LESS THAN 4 YEARS OF WORK BEYOND HIGH SCHOOL, 1971-72

IS PART C APPLICABLE TO YOUR INSTITUTION? ☐ YES ☐ NO
(If not applicable, omit.)

NOTE: EXCLUDE any students who have completed the first part of a 4-year baccalaureate curriculum, but who have not received any type of formal recognition other than a transcript.
